WEBSITE REBUILD PROPOSAL

# A New Standard for AG Williams Online

Prepared exclusively for AG Williams Painting

PREPARED BY
Vorti Digital

CONTACT
chris@vorti.io

DATE
March 14, 2026

INVESTMENT
$5,000 + ~$20/mo

SECTION 01

# The Problem

Your current website is costing you customers every single day.

**45** → **95+**

Current Score — POOR

Vorti Target — EXCELLENT

### Painfully Slow Load Times

WordPress + heavy plugins = 6-8 second loads. 53% of visitors leave after 3 seconds.

### Broken Mobile Experience

Over 65% of your traffic is mobile. The current site is barely usable on phones.

### Security Vulnerabilities

WordPress sites are the #1 target for hackers. Outdated plugins create constant risk.

### Expensive Hosting & Maintenance

You're paying $50-100+/mo for managed WP hosting plus plugin fees. That adds up fast.

### Invisible to Search Engines

Slow speed, poor structure, and missing schema mean Google ranks competitors higher.

### No Lead Tracking

Form submissions vanish into email. No dashboard, no follow-up tracking, no data.

SECTION 02

# The Solution

A purpose-built website engineered for speed, leads, and zero maintenance.

⚡

### Static-First Architecture

Pre-rendered pages served from edge CDN. No server processing, no database queries, no delays.

**Sub-1-second load times**

🛡️

### Unhackable by Design

No WordPress, no PHP, no database to exploit. Static files can't be injected or compromised.

**Zero attack surface**

📱

### Mobile-First Responsive

Every pixel designed for phones first, then scaled up. Thumb-friendly CTAs and fast interactions.

**100% responsive**

🎯

### Built-In Lead Capture

Smart forms with instant email notifications and a real-time dashboard you can check from your phone.

**Every lead tracked**

🔍

### SEO-Engineered

Semantic HTML, structured data, optimized meta tags, and lightning speed — everything Google rewards.

**Built for rankings**

🧠

### AI-Ready Content

Structured data that ChatGPT, Gemini, and Perplexity can read and recommend to potential customers.

**Future-proof visibility**

💡 **Hosting Cost: ~$20/month**

Your site will be deployed to Cloudflare's global edge network — the same infrastructure used by Fortune 500 companies. No managed WordPress hosting fees, no plugin subscriptions, no surprise bills. Just fast, reliable hosting at a fraction of the cost.

SECTION 03

# Features Included

Everything you need to dominate your local market online — nothing you don't.

🏠

### Residential Services Pages

Dedicated pages for interior, exterior, cabinet, and specialty painting — each optimized for search.

🏢

### Commercial Services Pages

Office buildings, retail, industrial — showcase your commercial capabilities with dedicated landing pages.

🖼️

### Project Gallery

Before/after photo galleries with lazy loading and lightbox. Organized by project type for easy browsing.

⭐

### Reviews & Testimonials

Automated Google review integration with structured data markup so stars show up in search results.

📍

### Service Area Pages

Geo-targeted pages for each town and county you serve. Essential for "painter near me" searches.

📝

### Smart Contact Forms

Multi-step forms that qualify leads with project type, timeline, and budget before they hit your inbox.

📊

### Analytics Dashboard

Real-time visitor tracking, conversion rates, and lead source attribution. Know what's working.

🗺️

### Google Business Integration

NAP consistency, embedded maps, and structured local business data for maximum local SEO impact.

SECTION 04

# Content Management

Update your site without touching code — or calling a developer.

Your new site includes a headless CMS that lets you update text, images, gallery photos, team bios, and service descriptions through a simple web interface. No WordPress login, no plugin updates, no breaking changes. Just log in, edit, and publish.

The CMS is designed for non-technical users. If you can use email, you can update your website. Changes go live within minutes, and you can preview everything before publishing.

## CMS Capabilities

- ✓ Edit page text & headings
- ✓ Add/remove gallery projects
- ✓ Edit service descriptions
- ✓ Update business hours
- ✓ Revision history & rollback
- ✓ Upload & manage photos
- ✓ Update team bios & photos
- ✓ Manage testimonials
- ✓ Preview before publishing
- ✓ Mobile-friendly editor

## Your Lead Dashboard

| WHO | WHEN | HOW |
|---|---|---|
| **Name, email, phone** | **Timestamp & source page** | **Project type & details** |

**NO MORE LOST LEADS**

Every form submission is stored in your dashboard, emailed to you instantly, and backed up. No more digging through spam folders or wondering if a lead came through. You'll also get weekly summary reports showing total leads, response times, and conversion rates.

SECTION 05

# Search & AI Visibility

Get found by customers — whether they search on Google or ask an AI.

### Technical SEO Foundation

Semantic HTML5, proper heading hierarchy, canonical URLs, XML sitemaps, robots.txt, and optimized meta tags on every page. The fundamentals that 90% of painting company websites get wrong.

### Local SEO Domination

LocalBusiness structured data, service area pages for every town you serve, NAP consistency enforcement, and Google Business Profile optimization. Own the "painter near me" searches.

### Core Web Vitals Perfection

Google's ranking algorithm directly measures page speed, visual stability, and interactivity. Your new site will score 95+ on all three metrics — putting you ahead of every competitor.

### Image & Content Optimization

WebP/AVIF format conversion, responsive srcsets, lazy loading, and descriptive alt text. Your project photos will load fast and rank in Google Image search.

THE FUTURE OF SEARCH

*"Who's the best painting company in the Hudson Valley?"*

*AI assistants like ChatGPT, Google Gemini, and Perplexity are answering questions like this right now. Your new site will include structured data and semantic markup that makes it easy for AI systems to understand, index, and recommend AG Williams. This isn't theoretical — it's already happening, and most of your competitors aren't prepared for it.*

**Analytics Stack**

Google Analytics 4, Google Search Console, and conversion tracking included and configured at launch.

**Target PageSpeed Score**

95+ on both mobile and desktop. Currently scoring 45. That's a 2x improvement in Google's ranking signal.

SECTION 06

# WordPress vs. Vorti

A side-by-side comparison of what you're leaving behind — and what you're getting.

This isn't about bashing WordPress — it's a solid platform for blogs. But for a local service business that needs speed, security, and leads, it's the wrong tool. Here's how the two approaches compare across every metric that matters.

| FEATURE | WORDPRESS | VORTI |
|---|---|---|
| Page Load Speed | ✕ 4-8 seconds | ✓ Under 1 second |
| PageSpeed Score | ✕ 30-50 typical | ✓ 95+ guaranteed |
| Security | ✕ Constant patching | ✓ Unhackable static |
| Plugin Updates | ⚠ Monthly headache | ✓ None needed |
| Hosting Cost | ✕ $50-150/mo | ✓ ~$20/mo |
| SSL Certificate | ⚠ Often extra | ✓ Included free |
| CDN / Edge Delivery | ✕ Extra plugin | ✓ Built-in global |
| Mobile Experience | ⚠ Theme-dependent | ✓ Mobile-first |
| Lead Dashboard | ✕ Plugin + setup | ✓ Built-in |
| SEO / Schema | ⚠ Plugin required | ✓ Native |
| AI Discoverability | ✕ Not optimized | ✓ Structured data |
| Downtime Risk | ⚠ Server-dependent | ✓ 99.99% uptime |

**Note:** WordPress hosting costs reflect managed hosting providers like WP Engine, Flywheel, or SiteGround Pro. Budget shared hosting is cheaper but compounds the speed and security problems listed above.

SECTION 07

# Project Timeline

From kickoff to launch in 5 weeks — with clear milestones at every stage.

WEEK 1

### Discovery & Strategy

Kickoff call, brand audit, competitor analysis, content inventory, sitemap finalization, and design direction. We'll gather all photos, copy, and service details needed for the build.

WEEK 2

### Design & Architecture

Wireframes, visual design mockups, component library, and CMS schema definition. You'll review and approve designs before any code is written.

WEEK 3

### Development Sprint 1

Core site build: homepage, service pages, about page, contact forms, and CMS integration. Mobile-first responsive implementation and performance optimization.

WEEK 4

### Development Sprint 2

Gallery system, service area pages, SEO implementation, schema markup, analytics setup, and lead dashboard configuration. Cross-browser and device testing.

WEEK 5

### QA, Migration & Launch

Final testing, content review, DNS migration, 301 redirects from old URLs, Google Search Console verification, and go-live. Post-launch monitoring for 48 hours.

SECTION 08

# Investment

Transparent pricing. No hidden fees. No surprise invoices.

ONE-TIME BUILD

**$5,000**

Complete website design, development, CMS setup, SEO, and launch

MONTHLY HOSTING

**~$20**

Cloudflare edge hosting, SSL, CDN, and domain management

## 📊 Year 1 Total Cost Comparison

| | |
|---|---|
| WordPress: Redesign by agency | **$8,000 – $15,000** |
| WordPress: Managed hosting (12 mo × $100) | **$1,200** |
| WordPress: Premium plugins & maintenance | **$500 – $1,000** |
| WordPress: Year 1 total | **$9,700 – $17,200** |
| Vorti: Build + 12 months hosting | **$5,240** |
| **Your Year 1 Savings** | **$4,460 – $11,960** |

SECTION 09

# Next Steps

Ready to move forward? Here's exactly how we get started.

## Let's Build Something Great

Reply to this proposal or reach out directly — we'll schedule a 30-minute kickoff call to get started.

**chris@vorti.io**

1. Accept Proposal
2. Kickoff Call
3. Build & Review
4. Launch Day 🚀

### Payment Terms

50% deposit to begin ($2,500). Remaining 50% due at launch. Monthly hosting billed separately. No long-term contracts.

### You Own Everything

All code, designs, and content are yours. Full repository access. If you ever want to move to a different host or developer, you take everything with you.

### Post-Launch Support

30 days of free support after launch for bug fixes and minor adjustments. Ongoing support available at hourly rates thereafter.
