SECTION 01

The Problem with Your Current Site

Your business has earned its reputation over 120 years. Your website is actively working against it.

45

YOUR CURRENT SCORE

Mobile PageSpeed

Poor

→

95+

AFTER REBUILD

Mobile PageSpeed

Excellent

Google grades websites 0–100 on how fast and usable they are on mobile. Below 50 is considered failing. 95+ puts you in the top tier.

🐌

Slow on Mobile

A 45 mobile score means visitors wait 5–8 seconds for your site to load. Most leave in 3. You're losing quote requests before they even see your work.

💸

Expensive to Update

Simple changes — a new service, updated pricing, a photo swap — cost $150–$300/hr or more when routed through an agency. That's money out the door for work you shouldn't need to pay for.

🔍

Invisible to Google

No structured data, no optimized sitemaps, no local business signals. When someone in Fairfield County searches for a painter, your competitors show up first.

🔧

Constant Maintenance

WordPress sites break. Plugin conflicts, PHP vulnerabilities, failed updates — you're one auto-update away from a blank page. Every patch is a potential problem.

📊

No Lead Tracking

When someone fills out a contact form, where does it go? An email that gets lost? You have no record of who reached out, what they wanted, or how they found you.

📱

Poor Mobile Experience

Over 70% of web traffic is mobile. If your site isn't built for phones first, you're alienating the majority of your potential customers before they read a single word.

SECTION 02

The Solution

What we're building — explained in plain English. No tech jargon. Just results.

⚡ Loads in Under 1 Second

Your site is built and deployed on global servers — content is served from whichever location is closest to the visitor. Images auto-compress. Code is lean.

95+ PageSpeed, every device

🔒 Can't Be Hacked or Broken

No WordPress plugins. No PHP vulnerabilities. The site is static by nature — there's nothing to exploit. Updates never break anything.

Zero maintenance emergencies

✏️ You Control the Content

Need to add a blog post, update a service, or upload project photos? You do it yourself in a clean dashboard. No agency required. No invoice to follow.

Free to update, forever

📍 Built to Rank Locally

Your site is structured exactly how Google wants it — business info, service areas, reviews, FAQs. You show up when and where it matters.

Dominates Fairfield County search

📥 Every Lead is Captured

Every form submission is saved to a dashboard with the date, what they asked about, and how they found you. Nothing falls through the cracks.

Full lead history, always

📱 Perfect on Every Screen

Designed mobile-first. Whether someone's on a phone in a parking lot or a laptop in an office, the experience is clean, fast, and easy to navigate.

70%+ of visitors are on mobile

On hosting costs: The site runs on Vercel's global edge network — the same infrastructure used by some of the largest companies in the world. Monthly cost: ~$20. That's it. No surprise invoices. No "your site went down" phone calls.

SECTION 03

What's Included

Every feature built to convert visitors into quote requests — and show 120 years of work at its best.

Interactive Service Area Map

An interactive map showing every town and city you serve in Fairfield County and beyond. Visitors immediately see if you cover their area — no guessing, no phone call to ask.

Project Gallery

A filterable gallery organized by service type — interior, exterior, commercial, specialty. Before/after comparisons. High-res images that load instantly. Your work speaks for itself.

Employee Directory

Filterable by specialty and role. Puts faces to the company. In a trust-based business like painting, showing your team — and their credentials — is a conversion tool.

Blog & Resource Center

A full content management system for blog posts. You write and publish directly. Each post is structured for SEO — driving free organic traffic month after month.

Testimonial Showcase

Curated client quotes presented cleanly — not a slow-loading Google widget. Faster, better-looking, and fully in your control. Video testimonials supported if you have them.

Live Chat Integration

Connect your existing live chat widget — or we add one. Visitors get answers instantly instead of leaving to call a competitor. Every chat captured in your lead dashboard.

Lead Capture & Email Opt-In

Multi-step quote request forms. Newsletter opt-in for painting tips, seasonal promotions, project showcases. Every submission saved with full context — source, date, service interest.

Click-to-Call on Mobile

On mobile, your phone number becomes a one-tap call button. Persistent on scroll. The easiest path from "interested" to "calling you" — which is exactly where you want them.

SECTION 04

Your New Content Dashboard

Update your own site. No agency. No invoice. No waiting.

You'll have access to a clean, modern content management dashboard — think of it like a Google Doc for your website. Log in, make a change, save. Done.

It's not WordPress. It doesn't look like a server control panel from 2005. It looks like a product you'd actually want to use.

What you can do without calling anyone:

- ✓ Add or edit blog posts with photos, formatted text, and SEO fields
- ✓ Update service descriptions and pricing
- ✓ Publish and manage testimonials
- ✓ Edit your About page, history timeline, and team story
- ✓ Upload new project photos to the gallery
- ✓ Add or remove team members from the employee directory
- ✓ Update service area coverage
- ✓ See and export every lead submission in one place

Your Lead Dashboard

Every quote request, contact form submission, and chat inquiry flows into a single dashboard. You'll see:

Who

Name, contact info, and what service they're interested in

When

Exact date and time of every submission — never lose a lead

How

Which page they came from and how they found you

Role-based access included. Give your team editor access without worrying about them breaking anything. Separate logins for admins and content editors — you stay in control.

SECTION 05

SEO & Online Visibility

Rank on Google. Get recommended by the tools your customers use to find contractors.

📍 Local Business Signals

Your name, address, phone, hours, service areas, and reviews are structured exactly how Google reads them for local ranking. You show up in map packs and local search results for every town you serve.

🗺️ Auto-Generated Sitemaps

Every page on your site is automatically mapped and submitted to Google and Bing. New blog posts get indexed within hours. Nothing falls out of search results because it wasn't crawled.

📝 Page-by-Page SEO

Every service page has its own unique title, description, and keywords — optimized for how real people in Fairfield County actually search. No duplicate content. No generic descriptions.

⭐ Review Schema

Your customer reviews show up directly in Google search results — the star ratings that appear under your listing. More visibility, more trust, more clicks before anyone lands on your site.

THE FUTURE OF SEARCH

"When someone asks ChatGPT or Perplexity 'who's the best painting company in Fairfield County?' — your site needs to be structured in a way those tools can read and recommend. That's exactly how we build it."

More and more people are using AI assistants to find local contractors. The companies showing up in those answers aren't spending more on ads — they're just structured correctly. We build that in from day one.

ANALYTICS STACK INCLUDED

Google Analytics 4 · Google Tag Manager · Google Search Console · Microsoft Clarity (heatmaps) · PageSpeed monitoring. You see exactly what's working — and what isn't.

TARGET: 95+ MOBILE SCORE

Competing agencies might get you to 70–75. We target 95+. That's not just faster for users — PageSpeed is a direct Google ranking factor. Higher score = higher position = more free traffic.

SECTION 06

Vorti vs. The Competition

A typical WordPress agency will quote $5,000–$15,000. Here's what you'd actually get — compared to what we deliver.

WHAT MATTERS	WORDPRESS AGENCY $5,000–$15,000	VORTI $5,000
Mobile PageSpeed Score	65–75 / 100	**95+ / 100**
Content Management System	WordPress admin (steep learning curve)	**Sanity Studio** Clean, modern, simple
Making Updates Yourself	⚠️ Risky without dev knowledge	✓ **Designed for non-technical users**
Cost of Simple Text Changes	**$150–$300/hr**	✓ **Free — you do it yourself**
Security Vulnerabilities	✕ Plugin exploits, PHP hacks	✓ **Static architecture — nothing to hack**
Site Breaking from Updates	✕ Frequent — plugin conflicts	✓ **Never. No plugin dependency chain**
Analytics & Heatmaps	⚠️ Google Analytics maybe	✓ **GA4 + GTM + Search Console + Clarity**
Lead Tracking Dashboard	✕ Contact form → email only	✓ **Full database with source attribution**
SEO: Structured Data (Schema)	⚠️ Yoast plugin (basic)	✓ **Full JSON-LD: LocalBusiness, Reviews, FAQ**
AI/LLM Visibility (ChatGPT etc.)	✕ Not considered	✓ **Built-in semantic structure**
Monthly Hosting Cost	**$30–$50/mo + extras**	✓ **~$20/mo, all-in**
Build Price	**$5,000–$15,000**	✓ **$5,000 flat**

Note on WordPress quotes: Many agencies will quote $5–15K for a WordPress site and deliver a theme with plugins. The site looks fine on day one. Six months later: plugins are outdated, speed has degraded, you're paying for maintenance, and you still can't make changes yourself. The sticker price is the smallest number in that relationship.

SECTION 07

Project Timeline

Five weeks from kickoff to live. Clear milestones, no surprises.

1 WEEK

Discovery & Design

Kickoff call to align on goals, brand guidelines, and content. Wireframes for all core pages. Design system established — typography, colors, component library. Content migration plan finalized.

2 WEEK

Core Build — Pages

Homepage, About/History, Services (individual pages per service), Gallery, Contact, and Blog shell. Mobile-first. Every page reviewed for conversion — CTA placement, visual hierarchy, trust signals.

3 WEEK

Core Build — Dynamic Features

CMS setup and configuration. Lead capture forms wired to dashboard. Employee directory, service area map, testimonial carousel, gallery filters. Live chat integration. Email capture flow.

4 WEEK

Integrations & SEO

Google Analytics 4, Tag Manager, Search Console, and Microsoft Clarity installed and verified. Structured data (JSON-LD) for every page type. Auto-sitemaps generated. Open Graph images for social sharing. Robots.txt optimized.

5 WEEK

Testing, Polish & Launch

Full QA across devices and browsers. PageSpeed optimization push to 95+. Cross-browser testing. DNS cutover and SSL configuration. Redirect mapping from old URLs to new. Post-launch monitoring for 48 hours.

What we need from you: Logo files and brand assets (or approval to use what's on the current site), access to current website for content migration, one call at the start of each phase for approvals. That's it. We handle everything else.

SECTION 08

Investment

A one-time build fee. A minimal monthly cost. And the end of paying your agency every time something changes.

ONE-TIME BUILD

$5,000

Flat rate. No change orders.

- All pages designed and built
- CMS setup and configuration
- Lead capture dashboard
- Full SEO architecture
- Analytics and tracking stack
- All dynamic features
- Launch and DNS cutover
- 30 days post-launch support

MONTHLY HOSTING

~$20

Vercel Pro — global CDN, SSL, analytics

- Global edge network
- Automatic HTTPS / SSL
- Unlimited bandwidth
- 99.99% uptime SLA
- Automatic deployments
- No maintenance windows
- Sanity CMS — free tier (included)
- Domain registration — you keep it (~$15/yr)

Year 1 Cost Comparison

WordPress Agency Build (midpoint)	$10,000
WordPress Hosting + Plugins (12 months)	+ $480
Agency update fees — avg 4 changes/yr @ $200	+ $800
WordPress path — Year 1 total	$11,280
Vorti Build	$5,000
Vorti Hosting (12 months)	+ $240
Vorti — Year 1 total	$5,240 — save ~$6,000 in year one alone

SECTION 09

Next Steps

Ready to move forward? Here's how we kick things off.

Let's Build Something Worth 120 More Years

Questions? Want to see examples, talk through scope, or get started?
Reach out directly — no forms, no sales team, no runaround.

david@vorticonnect.com

1. Send us an email or reply to this proposal
2. 30-minute kickoff call to align on scope and goals
3. Proposal accepted, 50% deposit, work begins Week 1
4. New site live in 5 weeks

PAYMENT TERMS

50% upfront ($2,500) to begin.
50% on launch day. No surprises.

YOU OWN EVERYTHING

Full ownership of code, domain, and CMS. You're never locked in to us for hosting or changes.

POST-LAUNCH SUPPORT

30 days of included support after launch. Bugs fixed, tweaks made, questions answered.
